

Intelora Resources and Developments is one of the fastest upcoming providers of Software Services and Solutions. Its mission is to incorporate solutions that can make the raise of organization uplift with no hassles and to sustain a competitive advantage. Our solution and development services engrave a wide spectrum of technologies, yet to become wider. Our design concept encompasses web technologies, programming build-ups, interactive systems, business components, and service-oriented architectures.

IOR offers a comprehensive range of software and IT solutions, including packaged applications for the Aeronautics, Payment Gateway, Credit Rating, Banking, Financial Services & Insurance (BFSI), Manufacturing, Contracting, Ecommerce and Retail & Distribution industries. In addition, it offers a broad range of software services such as Custom Software Development, IT Consulting, IS and IT Security Consulting, Product Enhancement, Cloud Computing, Mobile App Development, Enterprise Application Integration (EAI), Managed IT Services, including Power BI, Artificial Intelligence, Robotics, Data Science and specialized services such as Product Re-engineering, Compliance Consultancy, e-Governance, among others. We integrates its products and services to create customized solutions to allow you to undertake technology-based business transformation that allows reorganization in line with today's dynamic digital business environment.

IOR has the command, knowledge and confidence to provide the undoubted solution. We translate complex business and technology requirements into state-of-the-art, albeit easy-to-use solutions. Our emphasis on innovation and development of re-usable components and frameworks provides significant advantage and tangible value benefits to our clients. This desire to innovate and contribute pervades throughout the company, and forms the basis of our modus operandi.

Delivering competitiveness is what **IOR** believes and brings to its family of clients. Its vast repertoire of competencies begins from strategy, Consulting and value. **We work keeping clocks and watches away, for 24 Hrs a day and 365 days of year**, in short, our dedication is beyond time boundaries. How so ever huge it may be, we do not require six-figure budgets. In spite, our in-house solutions always provide real-time information to the extent of tough testing and thorough maintenance schedules. Result, of course is the consequence of worthy efforts, as said above.

Company Profile

People

We believe that our strength lies in our people and the most valuable resource we possess is our people. IORD's people are our assets and it is people who will ensure our success. Our business environment is dynamic, typified by a high degree of competition and rapid technological advances. IORD is not just a gathering of highly skilled individuals, but a team. It is built not only on someone's exceptional skills, but rather on collaboration and teamwork. Throughout years of growth, owing to investments into training, scrupulous selection procedures, competitive benefits and appealing career possibilities, we managed to assemble a mosaic of motivated, loyal and highly skilled IT professionals. The effective work of IORD resides on collaboration and teamwork between all its members, each one perfectly doing his own job.

Customers

IORD is dedicated to its customers and partners. We believe that the most important factor of our success is the success of our clients and provide them with tools that help their business growth.

IORD, both in idea and realization, is a client-oriented company. By supplying our customers with top resources and skills, we fulfill our main goal - add value to their businesses through knowledgeable application of information technologies. Because we work closely with and for our customers, we are successful only when our clients succeed.

Quality

We pay special attention to the quality assurance of the products and services we deliver. We believe that this is the best way to make products work as effectively as possible. Our clients can rely on our products or services working stably and as designed because we put an emphasis on quality assurance as a key factor in project success.

Services Solutions

- Customer Managed Development and Solutions.
- Web Application Development / Content Management Solution.
- Portal Development Branding & Internet Marketing.
- E-Commerce Application, i.e. B2B, B2C & C2C solutions
- Payment Gateway Solution.
- Development Social Networking Portals.
- Enterprise Software Development for Product Enhancement.
- Open Source Application & Application development.
- IOT with Cloud Computing solution
- Big Data, Data Visualization & Data Science.
- Quality Assurance & Testing Services Content Development.

Tools and Technology we work:

Core & Open Source	Portal Development	Mobile - App Development
JAVA, J2EE, JSP, Servlet, Struts, Spring, Hibernate, EJB, C#, PHP, Multi-Threading Engine,	Liferay, Portal Migration, Drupal, Jahia, WebRTC, ChatSupport, Spring portal	Android, iOS, Flutter, IONIC, ReactNative, App Optimization, MarketPlace, Progressive Web
Web Design & Development	Domain	DevOps Solution
AngularJs, NodeJs, ReactJs, JQuery, AJAX, Spring Web, JSP, JSF, CSS3, HTML5/ DHTML, JavaScript,	Payment Gateway, Ecommerce, Core & Corporate Banking, Credit Rating, Shipping, Forex, Media, Civil, Social Networking	GIT, Jenkin, Puppet, Chef, Docker, Ansible, Kubernetes, Spring boot
IOT	Big Data, Data Visualization	Artificial Intelligence (AI/ML)
Core, FreeRTOS, 1-Click, Analytics, Button, Event, Sensors, Bluetooth, Voice Command, NFC, LoraWAN	MVC, Struts, Spring, Hibernate, AXIS2, Open LDAP, EJB, JPA,	ChatBoat, OpenNLP, Java-ML, Scala MLib, Process Automation RPA, Power BI, Tableau, QlikSense, MSBI
Security	Databases Expertise	Micro-Service
Oauth2, AWS IAM, SSO, SAML, Spring Security, Encryption Implementation, User/Role/Permission Solution	Mongo DB, Cassandra, Graph DB, Neo4J, Nosql, AWS DynamoDB, MS-SQL, MySQL Server, Oracle 8i, Postgres,	API Gateway, Data Reconciliation, Eureka Netflix, Service Routing, REST Service Integration, Service Discovery & registry
Cloud Computing	AWS Solution	Others
PaaS, Log Monitor, Elastic Cloud, ElasticCache, Google Cloud, Cloud Analytics, Cloud Migration, Distributed Services	Athena, S3, EC2, DynamoDB, Migration, AWS Messaging, VPC, EKS, ECS, BeanStalk, Cloud Watch	JBPM, Pega, Informatica, Kafka, JMS, MQ, Architecture Solution, Enterprise Architecture Solution,

Key Expertise

Open Source

- **No licensing fees:** It's free for anyone to use and distribute at no cost. Many features that are available as extra cost add-ins in other office suites (like PDF export) are free with it. There are no hidden charges now or in the future. Possibly zero purchase price.
- **Open source.** You can distribute, copy, and modify the software as much as you wish, in accordance with either Open Source licenses.
- potentially no need to account for copies in use, reducing administrative overhead.
- Claimed reduced need for regular upgrades (giving lower/nil upgrade fees, management costs is lesser than other tools.)
- Claimed longer uptimes and reduced need for expensive systems administrators.
- near-zero vulnerability to viruses eliminating need for virus checking, data loss and downtime.
- Claimed lower vulnerability to security breaches and hack attacks reducing systems Administration load.
- Claimed ability to prolong life of older hardware while retaining performance

Field Area

High Competence

High professionalism of our employees is supported with collected knowledge base on technologies being used, and also unique scheme of management and communication within the company. As a result, we are able not only carry out complete development of new technologies and custom development, but also to render the fast and qualified technical support of any level, to render consultations on resolving difficult problems, to give unique technical knowledge through automated Knowledge Base site.

Consistent Product Development

We never stop our development for particular product if we believe there are other important features customers expect from us. It is usual practice when development department investigates and writes further technologies for next version of a product even sales and marketing departments yet prepares previous version for release. We always share current product improvements with our customers as soon as they become available, we can release minor updates several times between consequent versions.

Customer Assistance

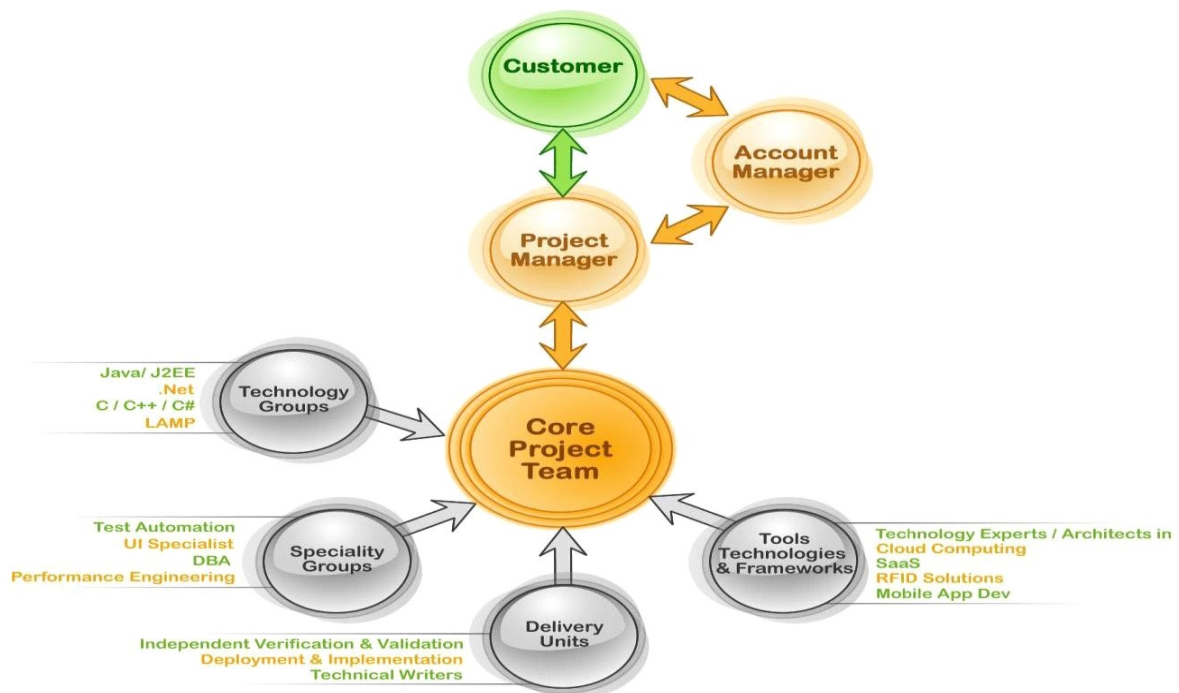

We understand that technologies in the field we share can be uneasy in use and therefore our company aspires to help customers in resolving their problems. First of all, it means the convenient, clear and intuitive interface in which we try to take the most of modern wizards. If a problem or a question arises, the user can try to find the answer with Knowledge Base by his/her own or contact support service for the quick and qualified consultation. Any user is always capable to receive the latest product update online and be confident that he/she uses leading technologies developed up-to-date.

Complete Business Cycle

IOR Utilities involves complete business cycle: development of unique technologies and building convenient appliances, quality assurance, technical support, distribution, publishing and licensing. This sheaf allows us not only to release competitive products at the reduced cost, but also to answer extremely dynamically to ever-changing demands of market.

Now IORD Utilities are 27+ professionals working as a solid team and is ready for further expansion. Currently our marketing activities include India, Canada, USA, Australia, and South Africa. Besides developing and marketing own products we are open for and have wide experience in: licensing, mutual development, custom development and releasing software development kits.

Delivery Structure

Why do you work with IORD?

IORD specially take care for client satisfaction and requirement fulfillment. We have defined several requirement analysis, development, management (including client managed), Application delivery strategies and features to make our clients comfortable happy and cheerful while work with IORD. In developing our project execution model, we at IORD adhere to the international standards like CMMI-SW. Every project has its 6 stages, which are:

1. Inception
2. Requirements Management
3. System Design
4. Software Solution Development
5. Product Integration
6. Quality Assurance

Inception

This is when the initial requirements collection takes place - our business analysts and software architects will carefully study your requirements to prepare a comprehensive proposal. You don't have to provide us with structured documentation. Just let us know your thoughts and expectations, and our specialists will work on defining all the details by asking you some questions and offering our ideas on your project.

Requirements Management

At this stage we will clearly describe your requirements in project documentation. Our specialists will prepare a proposal describing the product's performance, technologies, design features, verification requirements, etc. as well as the estimation of workload and cost of the project.

The requirements management allows for the activities for obtaining and controlling requirement changes and ensuring that other relevant plans and data are kept current. Requirements management continues all through the project, culminating in the comparison of the product against the requirements.

System Design

Once the requirements have been collected and analyzed, it is necessary to identify in detail how the system shall be constructed to perform necessary tasks. More specifically, the System Design phase is focused on the data requirements (what information shall be processed in the system?), the software construction (how shall the application be constructed?), and the interface construction (what shall the system look like? What standards shall be followed?).

Software Solution Development

The software solution development is the greatest stage of the project where most of the programming, coding and testing takes place.

Product Integration

At the Product Integration stage we define the best possible integration sequence, integrate product components and deliver the product to the client.

Quality Assurance

Quality Assurance is an essential part of any project, which ensures the top quality of our solutions. This is a complicated process, which takes place at all other stages of the project and includes the following activities:

- Strong project management
- Transparent project flow
- Well-defined requirements and structured project documentation
- Deep testing, bug-tracking and fixing
- Process monitoring, product evaluation in regard to the specified requirements and client expectations
- Usability analysis
- Confidentiality and Intellectual Property Protection

Methodology

Management Framework:

Technologies Overview

The choice of technologies for your project implementation is a critical issue because it will not only influence your project development time and cost, but also will determine how your application will stand the test of time and will be approved and appreciated by your clients.

With IORD Business Analysts you will be able to navigate all the technologies and platforms listed below, to choose the most up-to-date and win-win solution.

You will be able to discuss and negotiate the choice of the programming languages and technologies suitable for project aims, size and budget. We are always attentive to all your requirements and wishes, including technological preferences, because we believe that only close cooperation with our customers all the way in project development can bring a visible and effective outcome.
